KUSTOM KIT®

DRESSING YOUR BUSINESS

WELCOME TO OUR 2024 COLLECTION!

We're dedicated to helping you achieve maximum impact for your brand and our diverse range of styles have been developed with careful consideration for personalisation with your logo.

Our clothing offers a perfect blend of style, comfort and performance. It's also designed and made to last and our reputation for quality is reflected in each and every one of our garments.

Joining the collection for 2024 are several new styles including the KK336 ¼ Zip Hoodie (see page 32) which is a distinctive and versatile option for both casual and workwear. You'll also find more colour options available for a number of our established favourites including four new shades on the KK403 Klassic Polo.

We hope that you'll find some inspiration over the following pages to clothe your team in 2024.

For more product information, check us out online at **kustom kit.com**

BUY LESS BUY BETTER BUY KUSTOM KIT

THE MOST SUSTAINABLE GARMENT IS THE ONE YOU ALREADY OWN

For over 30 years our brand has been known for designing and manufacturing clothing that lasts. We believe that high quality, ethically sourced garments are crucial to reducing our environmental impact. Helping to slow down material flow, reducing overconsumption, and encouraging repair over replace.

WE MAKE QUALITY GARMENTS THAT LAST

Our designers take care to consider each detail of a garment's construction, optimising stitches per cm, and strengthening the areas that get the most wear.

We strive for functionality and durability but never at the expense of style and comfort.

Addressing environmental concerns is right at the top of our priorities list.

We know we're not perfect, so by evaluating and improving our business operations, we are continuing to reduce our environmental impact in our quest to grow sustainably.

This is our approach to a better and sustainable future.

We're also committed to eradicating modern slavery and forced labour.

Discover our approach to a better and sustainable future at **kustomkit.com/ourapproachtobetter**

NEW KK412 JERSEY POLO

SUPERWASH 60⁰

REGULAR FIT

TUMBLE DRY

Offering the comfort of a tee and the smart appearance of a polo.

KUSTOM KIT®

THE KLASSIC POLO

The original Kustom Kit polo. Offering the widest choice of colours and sizes, our Klassic Polo is renowned for its superior quality and Superwash® 60 performance.

Great workwear should provide exceptional performance in all working environments and our renowned Superwash® 60 collection doesn't disappoint.

Kustom Kit hallmarks such as ethical sourcing, superior quality construction and enhanced wearer comfort all come as standard, but our Superwash® 60 styles can also be washed up to 60°C for easier removal of stubborn stains without affecting shape or colour.

SUPER WASH® 60°

WHAT ARE THE BENEFITS?

FABRIC

Our Superwash® 60° fabrics are made from high quality yarns, knitted to a tight tension which means that the garments are super hard wearing. We use long fibred yarns that produce a compact fabric surface that is highly resistant to piling. Our dyes are designed to keep their colour even when washed at high temperatures while still being kind to the skin and the environment.

GARMENT MAKE-UP

The make-up is always of high quality. Features such as double stitched seams ensure durability whilst back neck and shoulder tape provide wearer comfort and shape retention. We also don't scrimp on stitches which ensures optimum seam strength.

PRINTABILITY

We have engineered all our Superwash® 60° fabrics to be the perfect base for decoration. The clean compact surface provides the perfect canvas for ink and vinyl. Its compact construction also allows for even the most stitch heavy embroidery designs.

ETHICALLY MANUFACTURED

Kustom Kit believes in respecting people and the environment. We ensure that our suppliers are totally committed to exceeding our high ethical standards. Our Superwash® 60° garments are very highly accredited, holding Oeko-Tex Standard 100, Oeko-Tex Made in Green, Oeko-Tex STeP, Wrap Gold, SEDEX and BSCI amfori.

Superwash 60 is a feature of 17 styles within our 2024 collection.

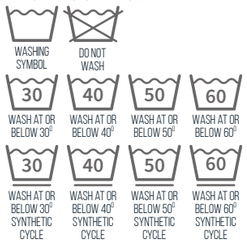
SIZES:	S - 3XL
FABRIC:	96% polyester 4% spandex
WEIGHT:	320gsm
FIT:	Regular

GARMENT CARE

Ever wondered what the little symbols on care labels mean? Here's a helpful guide on all you need to know about taking care of your Kustom Kit garments which can lead to a longer life for your clothes. So how can you make your clothes last longer without being ruined in the laundry? We've created a guide to help you identify the care symbols and understand what they mean including some conscious tips on how you can preserve the look of your garment for even longer whilst reducing the impact on the environment.

WASHING SYMBOL



The washing symbol is generally illustrated as a tub filled with water. If the garment is machine washable, it simply tells you the recommended washing temperature and the correct washing cycle. When you see one line drawn underneath the tub, it means that your garment should be washed on a synthetic cycle which offers a medium agitation wash along with a low-speed spin cycle that's best for your synthetic fibres. It's essential to wash at the correct temperature as this will protect the fabric and keep your clothes looking newer for longer along with the following tips:

- Close all zips, undo buttons, and flatten out collars and cuffs.
- Check pockets and linings or loose or sharp objects.
- Don't overload the washing machine.
- Turn your garments inside out to avoid abrasion from other garments.
- Check garments regularly for marks or stains and remove as soon as possible (see stain removal section for some helpful advice).

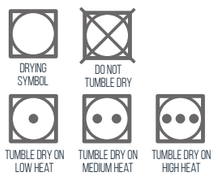
Conscious tip: Even though the labels illustrate the safe washing temperature for your garment, you can wash at a lower temperature to put less stress on the material of your garment as well as helping the environment. Most modern detergents perform just as well on a lower temperature.

BLEACH SYMBOL

Before attempting to improve your whites, please consult the care label because some garments might not be able to handle bleach agents. The bleach symbol is illustrated by a triangle. If you see an empty triangle then bleach is allowed, when necessary. Diagonal lines refer to the use of non-chlorine bleach and the crossed out triangle indicates that you shouldn't use bleach at all.

Conscious tip: Chlorine based bleach is great at removing stains, but it's also heavy on the environment. There are friendlier alternatives that can be used to whiten and brighten clothes. Natural solutions such as baking soda, white vinegar, or even lemons can help remove stains. Always test a removal method on a hidden patch of your garment.

DRYING SYMBOL

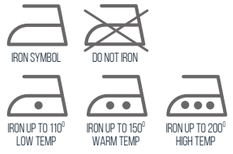


The above symbols will help you establish the correct drying method. Essentially, the more dots the higher the permitted temperature. The crossed out drying symbol simply means avoid tumble drying and their damaging effects on certain materials. When tumble drying is not advised see the following recommendations:

- When line drying shirts or jackets, always hang from the tail.
- Reshape whilst damp, by gathering the hem in one hand, holding the shoulders in the other and pulling back into shape.
- When line drying knitted garments, always fold over the line and position pegs at the underarm.
- When line drying trousers or skirts, always hang from the waist.
- Do not leave clothes exposed to the sun after they have dried.
- Avoid drying garments on radiators or in intense heat as this could distort the shape.
- Drying garments by hanging on coat hangers minimises creasing and speeds up the drying time.

Conscious tip: Tumble dryers require a lot of energy, cause stress on the fibres and can distort the shape of your garment. Air drying is much more sustainable and will prolong your wardrobe.

IRON SYMBOL



Irreparable damage can easily happen if the recommended heat setting is not adhered to, especially for delicate fabrics. The ironing symbol is illustrated as an iron with dots which indicates the temperature setting. Again the more dots the higher the temperature.

- Do not iron directly onto a printed garment, always iron on the reverse.
- When ironing dark garments avoid 'iron shine' by either pressing on the inside of the fabric or through a damp cloth.

Conscious tip: As ironing can cause stress to your garments, a good alternative is to simply hang your clothes in the bathroom while you're having a hot shower as the steam should smooth out the wrinkles. Hanging your garments to air dry will also minimise and reduce creases and wrinkles.

DRY CLEAN SYMBOLS

A circle indicates if your garment is suitable for dry cleaning, while the letters instruct on the required solvent to use.

Conscious tip: Dry cleaning is a highly chemical intense process. A simple alternative is to hand wash delicate fabrics using mild soap and lukewarm water.

COMMON WASH PROBLEMS

Shrinkage:
The major contributing factors to shrinkage are heat and excessive agitation. Therefore, do not wash at too high temperatures. Always wash on the most appropriate cycle and follow the care instructions.

Pilling & Bobbling:
Abrasion and lack of regular washing cause fibre balls to appear on the surface of the fabric. Remove carefully by brushing or picking off.

Fading in the Sunlight:
Sunlight can be very harmful to fabrics and the effects are irreversible. Reduce exposure to direct sunlight wherever possible.

Colour Staining:
Always wash similar colours together. Never leave damp garments together for any length of time

STAIN REMOVAL

Most stains can be rectified by fast action, basic household items and these helpful tips.

White Wine: Rinse the stain in warm water then soak in a warm detergent solution.

Red Wine: First soak the stained area immediately in white wine or soda water to remove the colour, then launder as per the care label.

Beer & Spirits: Firstly, rinse or soak the stain in lukewarm water and then launder in heavy duty detergent as per the care label.

Coffee & Tea: Soak up liquid with an absorbent cloth and sponge with warm water. Rinse with cold water and wash as per the care label.

Food: Soak the stain in cold water and salt or in warm soapy water and then wash immediately as per the care label.

Fat, Grease & Oils: Remove as much of the deposit as possible and work in neat washing up liquid with fingers. Treat with warm water and then wash immediately as per the care label.

Ball Point Pen: Apply methylated spirit or glycerine sparingly and mop up any loose colour. Rub any remaining stain with detergent and wash as per the care label.

Make-up: Do not rub the stain. Pat with talcum powder to soak up any grease and then work in neat washing up liquid with fingers before washing.

Extra tips and advice

- Most stains can be removed by soaking in cold water, but as with all stains, prompt attention is important.
- Do not use hot water to rinse the stain as this may cause it to set.
- Place the stain over an absorbent cloth or wad of kitchen paper. To avoid the dreaded ring, first target the area around the stain and then work towards the centre.
- Always test the removal method on a hidden part of the garment first to ensure that it does not harm the fabric.

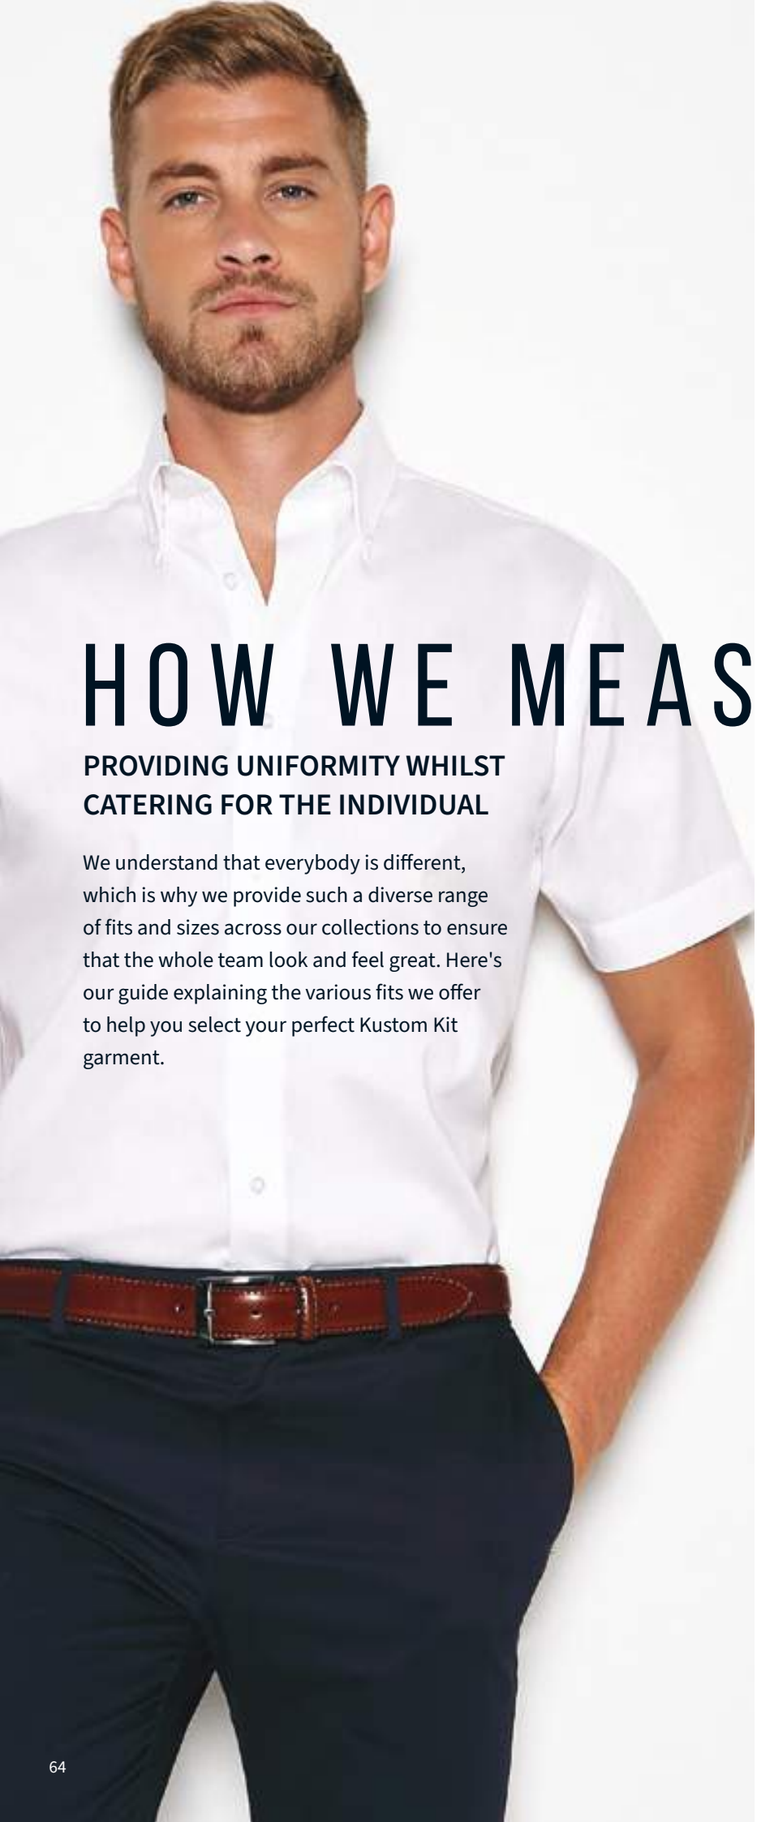
PRODUCT SPECIFICATION SHEETS

Due to the variety of different fits across the Kustom Kit range, we encourage our customers to examine individual product specification sheets in order to establish precise measurements for each garment.

These sheets are available to download from the respective product pages at **www.kustomkit.com** and provide a comprehensive overview of measurements including actual chest, length and sleeve length along with a product description, ethical accreditation and care instructions.



HOW WE MEASURE UP

PROVIDING UNIFORMITY WHILST CATERING FOR THE INDIVIDUAL

We understand that everybody is different, which is why we provide such a diverse range of fits and sizes across our collections to ensure that the whole team look and feel great. Here's our guide explaining the various fits we offer to help you select your perfect Kustom Kit garment.

GENERAL FIT INFORMATION

Our non-shirting styles comprise of the following cross-section of fits as denoted on the individual product pages...

CLASSIC FIT

A traditional forgiving silhouette allowing ease of movement.

REGULAR FIT

True to size.
A neater more contemporary fit without being restrictive.

SLIM FIT

Close fitting throughout the body and sleeve.

FASHION FIT

Body skimming fashion led styling.

SHIRT FIT INFORMATION

Our corporate shirt collection is one of the most diverse in the market. We've created a range that empowers teams to feel smart in any business environment whilst catering for individual preferences. In order to achieve this we've continually developed our choice of fits to provide enhanced wearer satisfaction.
The following guide will help you understand the design of each fit in order to help you find your ideal shirt.

WHAT'S MY SIZE?
To decide on the best fit for you, it's important to know your measurements. Firstly measure your chest around the fullest part and refer to our measuring guide. Next measure your collar, around the base of your neck whilst keeping your index finger between the tape and your neck, again refer to the measuring guide. The measuring guide is in actual body measurements not garment measurements, so if your chest measures 43"/109cms and your collar measures 17"/43cms we recommend that you take a 17" collar Kustom Kit shirt.

WHAT IF I'M IN-BETWEEN SIZES?
This will depend on how you like to wear your shirts. Classic shirts are cut more generously so will be more forgiving if you size down. Slim fit shirts however are neatly cut so we would recommend sizing up if you are between sizes.

MY COLLAR SIZE IS DIFFERENT TO MY CHEST SIZE
If you intend to wear a tie we recommend buying to your collar size measurement to ensure a neat and comfortable fit. Choose a classic fit if you use your collar size and a slim fit if you use your chest size. If you intend to wear the top button open then you should fit your shirt to your chest rather than your collar measurement.

STILL UNSURE?
Kustom Kit can provide size charts for all garments upon request and our Customer Services team will be happy to answer any queries that you may have.

WHAT'S MY FIT?

We offer three different shirt fits

CLASSIC FIT

A traditional silhouette featuring straight side seams and a more generous fit across the chest, waist and sleeves. Cut with a long shirt tail that stays tucked in and wide armholes for ease of movement. Our classic shirts will have either side pleats or a central pleat to the back yoke for a non restrictive and comfortable fit. As a guide based on a 17" collar shirt the actual chest measurement will be 16cms larger than your actual chest and 32cms larger than your actual waist. Sounds a lot? Not really when you consider these measurements in a three dimensional context.

TAILORED FIT

Our tailored fit shirts are just that! Tailored throughout the body and sleeve for a closer fit that is both smart and contemporary. We taper the waist to ensure a clean silhouette while retaining an unrestricting garment shape. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 22cms larger than your actual waist.

SLIM FIT

Our closest fitting shirt is tailored through the body and sleeve. For a sleek appearance we taper the waist and add darts to the back. We keep the cut narrow at the shoulder and lift the armhole to enhance the modern slim silhouette. The result is a surprisingly flattering wearable garment that suits all. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 14cms larger than your actual waist.

Stretch Fit: Our slim-stretch shirts combine an ultra-sleek fit with a touch of elasticity to enable full range of movement whilst retaining the unmistakable feel of a Kustom Kit shirt.

The operations of the 2013 Accord agreement was transferred to the RMG Sustainability Council (RSC) in 2020.
As such, certification is in a transition period, and we have a combination of both Accord and RSC certification.
These are considered one and the same.
